

CYBERSECURITY FOR FOOD & BEVERAGE

As the food and beverage industry embraces digital transformation, serious cyber attacks are increasing. In recent years, fruit and vegetable producers had to temporarily shut down production plants as a result of ransomware attacks. Therefore, it is vital to raise your cyber resilience. Let Secura help you.

YOUR CHALLENGES

- How to **prevent digital attackers** from interfering and disrupting production.
- How to **raise your resilience** against ransomware attacks.
- How to deal with **third party risks** and vulnerabilities in the supply chain.
- How to **comply with applicable cybersecurity regulations**, like the upcoming NIS2 directive.
- How to **raise awareness** of your people.
- How to **manage increased connectivity** to weaker OT systems.

HOW WE SUPPORT YOU

Secura has been a cybersecurity company for over twenty years. Cybersecurity is in the DNA of our company, and our presence in the food and beverage industry is well established.

We understand the importance of food safety and the complexity you face, due to the reliance on complex supply chains, IoT devices and sensitive data.

Secura is part of the Bureau Veritas Group, a listed company and world leader in testing, inspection, and certification services.

OUR AREAS OF EXPERTISE

Our experts are highly experienced in working with food and beverage organizations. Several of the largest global food companies trust us as their cybersecurity partner.

Cybersecurity isn't about checking boxes on a requirement form, it's about creating a cyber mature culture focused on food safety, and we have worked with the leaders in your industry to achieve such an objective.

OUR SERVICES

Secura offers various cybersecurity services. Please find our services in food and beverage below.

MITIGATE CYBER RISKS

- **Threat Modeling** | Find out from which perspective threats arise, during an interactive workshop.
- **Vulnerability Assessment / Penetration Testing** | Discover weak spots in the security of systems and infrastructure.
- **Tabletop Cyber Crisis Management** | Assess your cybersecurity processes during a workshop in case of a severe cyber incident.
- **Vendor Security** | Assess the cybersecurity of your vendors.
- **IT/OT Site Assessment** | Assess your site according to international recognized standards.
- **FAT/SAT Testing** | Test your Industrial Control Systems in new facilities or new production lines.
- **Red Teaming in OT** | Train your defenders by simulating full-spectrum cyber attacks. This way they practice their detection and response capabilities against high impact, low frequency events.
- **Ransomware Resilience Assessment** | Discover how vulnerable your organization is to ransomware attacks and receive actionable advice on how to improve your ransomware resilience.
- **Secura CyberCare** | Let Secura be your cybersecurity partner. Together, we will work on raising your cyber resilience now and in the future.

COMPLY WITH REGULATIONS

- **Security Consultancy and Implementation support** | Raise the cyber resilience of your processes and technology, and comply with applicable regulations, such as NIS2 (from October 2024)
- **NIS2 Boardroom Training** | Get ready for NIS2. A 1-day in-company training specially aimed at directors of NIS2 organizations with cybersecurity in their portfolio.

RAISE AWARENESS

- **Cybersecurity Awareness and Behavior Training** | Raise the cyber resilience of your people.
