Secura
A BUREAU VERITAS COMPANY

WILL YOU **BREAK IT UNTIL YOU MAKE IT?**

HAVE YOU BEEN HACKING your WiFi

at home to beat your parents' attempts to get you offline? Do you hack your video games while playing? Do you see hacking as solving a complex puzzle?

Then a career at Secura might be for you!

Secura is a cybersecurity company with a team of highly-skilled ethical hackers with a lot of passion to break in everywhere (legally) and we are always looking for new team members. We do not just offer you a job, but a career to developer yourself as a cybersecurity professional.

Do you have a passion for IT security and do you want to expand your knowledge and share this knowledge? In that case, we would like to meet you
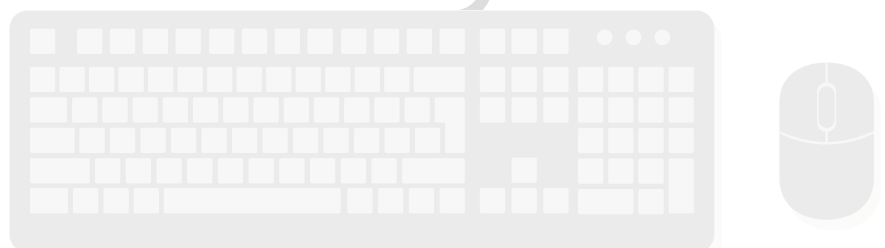

Do you have questions? Feel free to ask! Contact our recruiters Eefke & Sara by phone at **+31 (0)88 888 3100** or email us at **jobs@secura.com**.

YOUR FIRST YEAR PROGRAM

A first year at Secura involves four training courses, two certifications, and actual client work from the second month onward to fast-track your hacking skills in web apps, infrastructure and mobile hacking!

This is only year one. A highlight of what is to come: courses like OSCP, OSCE, SANS and jobs like internal pentesting, social engineering, reverse engineering and red teaming.
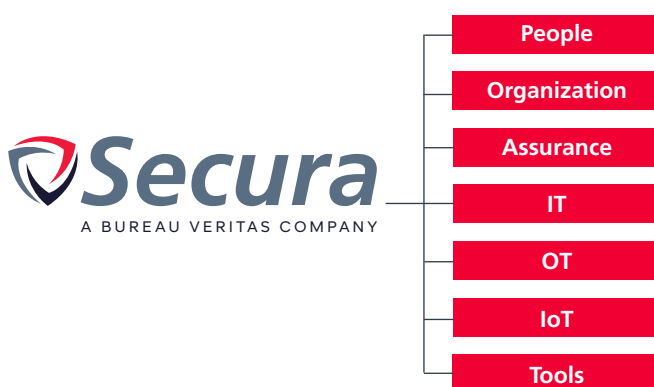

TIMELINE

1 Hacking 101
Our dedicated onboarding program of 1.5 weeks with Burp, LaTex, etc.

2 Webapp Certification
eWPT web application hacking course and certification exam in two weeks.

3 Real-world Client Work
From 3rd man projects (extra) to project lead on actual projects in black-box infra (BBI), black-box web app (BBA) and grey-box web app (GBA) testing for 2 months.

4 Longer Term Project
Performing on-site hacking, API testing/fuzzing, web application hacking and testing endpoint security while talking to clients and developers!

5 Expanding Your Skills
Enhancing your skills in team work with DigiD assessments and more complex BBI/BBA/GBA projects.

6 Mobile Training Course
Follow our in-house training course on mobile application hacking for Android and iOS.

7 Getting your mobile skills down
Two months of dedicated mobile client work to try out your new skills.

8 Personal Performance Training
Boost your soft skills.

9 Training Your Skills 2.0
Getting into ever more complex stuff, breaking out Citrix environments, CBA (if you can code), WiFi investigations, social engineering, bring it on!

10 Infrastructure Certification
Getting ready for complex pentests with the eCPPT infrastructure course and certification.

WE ARE SECURA

Secura is an independent and ambitious security assessment company that supports their clients in taking control of their digital security from people, process and technology perspectives. With a strong passion for technology, we love to share our knowledge and aim for continuous improvement in all that we do!
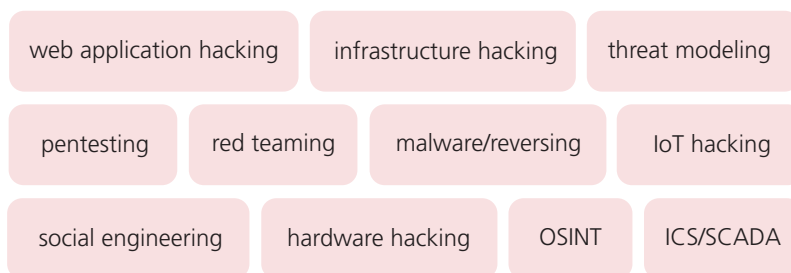

SECURA AS A COMPANY

Secura has an holistic view to security assessment with five service lines while retaining commercial independence and integrity.

| pentesting | red teaming | malware/reversing | IoT hacking |

| social engineering | hardware hacking | OSINT | ICS/SCADA |

MY FIRST YEAR AT SECURA

I started at Secura as an intern, to write my thesis and get better connected to the cybersecurity world. Without any prior experience in a security company, this was a warm welcome.

*After graduation, I came back to Secura and I now work on complex assessments and keep developing my security skills through certifications and training courses.
I really like how Secura offers many opportunities for personal growth and motivates employees to keep learning and expanding their knowledge.*

Roy,
Security Analyst
