REGULATING THE SEAS:

CYBERSECURITY FOR MARINE & OFFSHORE

MARITIME SHIPPING
SHIPBUILDING
PORTS
MARINE ENGINEERING
OFFSHORE WIND ENERGY

As the maritime industry embraces digital transformation, it faces increasing cyber threats. Recently, several notable maritime cybersecurity incidents took place. They had a severe impact on thousands of ships and maritime personnel. Therefore, it is vital to raise maritime cyber resilience. Let Secura help you.

YOUR CHALLENGES

- **How to comply with all current and upcoming regulations**, such as the IMO Resolution MSC.428, UR E26 and UR E27.

- **How to mitigate cybersecurity risk**s in complex systems that connect operational and information technology on board and on shore. This includes vulnerabilities from third party infrastructure, such as satellite communications and cloud services, and emerging technologies, such as autonomous vessels.

- **How to raise cybersecurity awareness** among maritime personnel.

HOW WE SUPPORT YOU

Secura has been a cybersecurity company for over twenty years. We help large and medium sized maritime organizations around the world raise their cyber resilience. Secura is part of the Bureau Veritas Group, a listed company and world leader in testing, inspection and certification services.

OUR AREAS OF EXPERTISE

We have a strong background in working with maritime organizations. Some of the largest shipping companies trust us as a partner in cybersecurity. Our areas of expertise include threat modelling, ransomware resilience, compliance with regulations and consultancy services, training courses and awareness programs, vulnerability assessments, attack surface management and more.

OUR SERVICES

Secura offers various cybersecurity services. Please find our most popular services in maritime cybersecurity below.

- **Security Consultancy and Implementation support** – to raise cyber resilience of your processes and technology, and to comply with applicable regulations, such as the IMO Resolution.

- **Compliance service** with industry standards and norms, such as IEC62443 and NR659.

- **Threat Modeling, IT / OT Vulnerability Assessments, Penetration Testing**

- **Cybersecurity Awareness and Behavior training**. Raise the cyber resilience of your people.
