

RAISING YOUR CYBER RESILIENCE

CYBERSECURITY SERVICES

Raising Your Cyber Resilience

With new technologies come new risks to your cybersecurity. Identifying and minimizing these risks is more critical than ever. Safeguard your digital assets. Experience peace of mind and stay ahead of adversaries by raising your cyber resilience.

TAKE ACTION

Despite the growing threat, not all organizations are protecting themselves adequately. Some wait until they're featured in the news as the latest victims of a security breach before they take action. Others have the basics covered, but don't know they're vulnerable in other areas. We believe the first step is a proactive attitude: understanding that security is crucial to your organization.

AGAINST CYBERCRIMINALS

It is important to take action now: building defenses against cybercriminals who are constantly innovating. Protecting yourself against the risks that come with

complex technology. Your organization might not have the necessary security knowledge or expertise. This is where Secura can help you.

SAFER DIGITAL WORLD

Secura helps organizations from all over the world to protect themselves. Our international security team is committed to help you identify and reduce your digital security risks. Our consultants use the latest test and assessment techniques for IT, OT and IoT systems. We want to make the digital world safer for everybody. We care about your security. That's why we want to help you raise your cyber resilience.

OUR MISSION

Secura helps you to protect your organization against cybercrime. Our services help you gain control of your security, give you peace of mind and build trust with your stakeholders. It is our mission to assist you by:

RAISING YOUR CYBER RESILIENCE

We believe in an integrated approach to cybersecurity. People, process and technology are all part of the solution.

PEOPLE

The human factor is essential in protecting your organization and its digital assets. Secura offers an awareness program and different training courses to raise the cyber resilience of your employees.

PROCESS

Governance, policies and assurance are crucial to organizing cybersecurity. Secura's advisory team can help you with the implementation and audit of your security processes, systems, offices and vendors.

TECHNOLOGY

Your IT, IoT and OT systems and products need to be secure. Secura's security specialists test and assess your security from A to Z, according to international standards and control frameworks.

INTEGRATED APPROACH TO CYBERSECURITY

BUREAU VERITAS

Since 2021, Secura is a Bureau Veritas company. Bureau Veritas (BV) is a publicly listed company that specializes in testing, inspection and certification. BV was founded in 1828, has over 80.000 employees and is active in 140 countries. Secura is the cornerstone of the cybersecurity strategy of Bureau Veritas.

OUR SERVICES

Our services are designed to help you raise cyber resilience in all the aspects of your organization.

PEOPLE

-  Phishing
-  Social Engineering
-  eLearning
-  Training
-  Security Behavior Review
-  SAFE Program (Behavior)

PROCESS

-  Security Maturity Review
-  Audit & Assurance
-  Vendor Assessment
-  Tabletop Crisis Management
-  IT / OT Assessment
-  Security Management

TECHNOLOGY

IT

-  Vulnerability Assessment / Penetration Testing (VAPT)
-  Design Review
-  Threat Modeling
-  SIEM / SOC Testing
-  External Attack Surface Assessment

OT

-  Site Assessment
-  NIS2 Compliance
-  Threat Modeling
-  Industrial VAPT
-  OT Cyber FAT / SAT

IOT

Audit, testing & certification for:

-  Consumer products
-  Industrial IOT products
-  Medical devices
-  Automotive
-  Common Criteria / BSPA

INTEGRATED APPROACH

-  Ransomware Resilience Assessment
-  Red Teaming
-  Digital Forensics & Incident Response
-  Security Advisory
-  CISO-as-a-Service
-  Secura CyberCare

HIGHLIGHTED

SAFE PROGRAM (BEHAVIOR)

Your employees probably know their behavior impacts the security of your organization. But do they act accordingly? Our SAFE program bridges the gap between awareness and behavior. Its goal is to achieve behavioral change, with one or two-year behavior programs. Our psychologists and security specialists work together to offer you e-learnings, phishing simulations or assessments with focus groups.

VULNERABILITY ASSESSMENT / PENETRATION TESTING (VAPT)

Does the security of your application or internal system have weaknesses? You want to know about these before malicious actors can use them against you. A Vulnerability Assessment or Pentest (VA/PT) helps you find vulnerabilities in your applications, internal networks, wireless technologies, cloud services and OT environments. Our pentesting team consists of over 60 highly qualified specialists.

RANSOMWARE RESILIENCE ASSESSMENT

How vulnerable is your organization when it comes to ransomware? There are a lot of factors at play here. Our Ransomware Resilience service assesses the resilience of the people, processes, and technology in your organization. For instance: we test the awareness of your employees with a controlled phishing attack. We assess the security maturity level of your processes, and test your technology with an IT or OT pentest. The final report helps you raise your resilience against ransomware.

RED TEAMING

Can your organization withstand a digital attack? There is only one way to test this: by performing an attack as a malicious attacker would, using real world tactics, techniques and procedures (TTPs). Secura's Red Teaming service tests your defenders' capability to detect, respond to and mitigate attacks in a realistic setting. Our specialists use different kinds of attacks – like social engineering and exploiting technical vulnerabilities – to find unknown weaknesses and to train your defenders.

WHY CHOOSE SECURA?

Many digital security companies operate in Europe, but only a few of them can be considered true experts. What makes Secura so unique?

EXCELLENCE

OVER 20 YEARS' EXPERIENCE

Digital security is an complex and quickly changing field, a constant struggle between digital intruders and defenders. Secura has over 20 years' experience in this field, we are constantly adapting and succeeding.

THOUGHT LEADERSHIP

Our consultants spend a significant amount of time on R&D. Secura also collaborates with academic researchers. For instance with researchers and internship students from Radboud University, the Technical Universities of Eindhoven and Delft and other top-tier academic institutions.

HIGH CUSTOMER SATISFACTION

Our customers rate our services highly. In 2022, our average NPS score was 8.5. Our reports contain clear management information with precise assessments and useful recommendations. This means you can take immediate action to raise your cyber resilience.

INDEPENDENCE

Secura is an independent security assessor. Virtually all other companies that provide security testing and audit services are also accountants, or partner with product vendors. We value our independence. It means you can trust the results of our tests completely: we don't have a hidden agenda.

TRUSTED PARTNER

Our team of experts prioritize customers' needs to help them take a proactive approach towards cybersecurity. Our expertise, experience and critical thinking has been valued by customers across many sectors over many years.

“

OUR PARTNERSHIP WITH SECURA PROVIDES NS WITH **EXCELLENT CYBERSECURITY EXPERTISE**”

Onno Wierbos, NS (Dutch Railways)

MARKET EXPERTISE

Cybersecurity affects us all. However, certain sectors require specific expertise to ensure your cybersecurity is approached in the most efficient, effective and safe way. Our experts have built-up experience within these markets, and share knowledge across markets as well to -learn from each other.

HIGH QUALITY

INTERNATIONAL STANDARDS

Our aim to make security visible and comparable. That is why we follow international standards where we can. For instance: OWASP Application Security Testing Guide. This means you know with which level a system or security test complies.

CERTIFIED SERVICES

We are proud of our wide ranging certifications. For instance:

- **CREST:** We are accredited for pentesting and vulnerability assessments by CREST.
- **CCV:** We were the first company to receive the Dutch 'CCV-keurmerk Pentesten' certification.
- **Common Criteria:** Our product security lab is accredited by Common Criteria.
- **BSPA:** Secura is one of a few companies accredited by the Dutch government for the BSPA (Baseline Security Product Assessment) scheme.
- **ISO:** Secura is ISO 9001:2015 and ISO/IEC 27001:2013 certified.

GLOBAL TIES

Cybercrime is a global problem, which is why we believe in strong international cooperation. This is reflected in our hiring policy: we employ experts from over 25 different countries and can therefore provide support in various languages. We are also part of several partnerships: European Cyber Security Organization (ECSO), on European level, and Cyberveilig Nederland, on national level.
